

Caltag Medsystems Ukraine Supply Chain Statement

March 2022

Dear Customers and Partners,

At Caltag we are appalled by the situation in Ukraine and hope that diplomacy and reason will soon replace war as the ways to resolve political differences.

We are in the process of assessing our supply chain to understand the full impact of the war in Ukraine, and the subsequent economic sanctions and logistical disruptions. **At this time, we have not identified anything that increases the risk in supply of any of our products.**

We will keep this situation under continuous review and update our customers should anything change.

Kind regards,

Dean
